Institution**

# INDEX

<b>Sr. No.</b>	<b>Details</b>	<b>Page No.</b>
1.	Solid Waste Management	3-8
2.	Liquid Waste Management	9
3.	E- Waste Management	10
4.	Waste Recycling System	10

## 1. Solid Waste Management:

Solid waste is categorized into decomposable and non-decomposable waste. Waste which does not belong to garbage or trash is sent for recycling such as waste papers, old files etc. Metals from our college are collected and sold out to authorized purchasers for recycling. Waste from canteens and garden is dumped underground in an eco-friendly manner without pollution. Dry waste is collected by "Gram-Panchayat" for disposing to nearby wrecking yards.

College adopts a paperless office concept through electronic means via WhatsApp groups, email and Google Classroom; thus, reducing paper-based waste. Use of paper printed on one-side is encouraged in printing drafts before final document, meeting minutes, notices etc. in office practices as an alternative to waste management.

The college has installed a Bio composting plant, wherein, the biodegradable kitchen waste, garden waste is composted and is used as a fertilizer for the garden.

Dustbins have been installed in the campus for waste segregation.

## 2. Liquid Waste Management:

Waste water treatment is done through Sewage Treatment Plant, in which, the contaminants are removed from waste water and used for gardening and other purposes. Different kinds of filters are used in STP such as "Activated Carbon Filter" used to absorb chlorine, organics, color, taste and odor from wastewater and those are replaced at regular intervals.

Fig 2(a): Sewage Treatment Plant

### 3. E- Waste Management:

The e-waste generated in college is disposed outside. At college level, we try to reuse maximum possible material before disposal.

### 4. Waste Recycling System:

- Paper waste is sold out for recycling
- Vermicomposting used to recycle solid waste and food waste
- Liquid Waste after proper treatment used in irrigation
